State Officials Announce Latest COVID-19 Facts

SACRAMENTO – The California Department of Public Health today announced the most recent statistics on COVID-19. California now has 675 confirmed cases. For more information on COVID-19 and California's response visit the [California Department of Public Health website](#).

COVID-19 in California by the Numbers

Note: The following numbers reflect information received by local health jurisdictions as of 6 p.m. PDT March 18. More current numbers may be available from [local health jurisdictions](#).

675 – Positive cases

16 – Deaths (including one non-California resident)

Ages of all confirmed positive cases:

- Age 0-17: 13 cases
- Age 18-64: 448 cases
- Age 65+: 209 cases
- Unknown: 5 cases

651 – Cases not related to repatriation flights

- 97 – Travel-related
- 92 – Person to person
- 181 – Community transmission
- 281 – Under investigation

24 – Cases of positive tests related to federal repatriation flights

22 – [State and county health labs](#) currently testing

In order to better focus public health resources on the changing needs of California communities, on March 18, the state is no longer collecting information about California travelers returning from countries that have confirmed COVID-19 outbreaks. Community transmission of COVID-19 has been identified in California since late February, and

since early March, most of the confirmed cases in the state were not related to travel outside of the United States.

Testing in California

As of 6 p.m. PDT on March 18, approximately 16,900 tests had been conducted in California. This includes the latest numbers California has received from commercial and private labs. At least 6,300 results have been received and another 10,000+ are pending.

How People Can Protect Themselves

Every person has a role to play. Protecting yourself and your family comes down to common sense:

- Washing hands with soap and water for a minimum of 20 seconds.
- Avoiding touching eyes, nose or mouth with unwashed hands.
- Cover a cough or sneeze with your sleeve, or disposable tissue. Wash your hands afterward.
- Avoiding close contact with people who are sick.
- Staying away from work, school or other people if you become sick with respiratory symptoms like fever and cough.
- Practice social distancing.
- Following guidance from public health officials.

What to Do if You Think You're Sick

Call ahead: If you are experiencing symptoms of COVID-19 (fever, cough or shortness of breath) and may have had contact with a person with COVID-19, or recently traveled to countries with apparent community spread, call your health care provider before seeking medical care so that appropriate precautions can be taken.

California continues to issue guidance on preparing and protecting California from COVID-19. Consolidated guidance is available at www.cdph.ca.gov/covid19guidance.
