

Tooth decay is the most common childhood disease and is preventable! Schools play an important role to help reduce chances of cavities and to ensure overall student health.

San Joaquin County Public Health Services (PHS) is in partnership with Community Medical Centers (CMC) to provide schools with dental services and education to students in K-6th grade at schools. Our dental program can help lower absences and provide access to dental care for students and families.

Common oral health issues include:

- Cavities/Tooth Decay
- Poor Dental Hygiene
- Self-esteem issues
- Pain, leading to less concentration at school

What dental services are provided at schools?

-  Oral Health Education
-  Dental Screenings
-  Dental Cleanings
-  Sealants
-  Kindergarten Oral Health Assessment (KOHA) Completion

What is the cost for schools and parents?

NO COST! Services are free!

Note: . If your child is covered by Medi-Cal, the dental services we provide will be billed to Medi-Cal. All other services not covered by Medi-Cal are at no cost to you.

Funded by the California Department of Public Health under Contract 22-10194

If you are interested in having our dental program at your school or have any questions, please contact Claudia Alonso at calonso@cmcenter.org.
